ACADEMIC DETAILS

B.Tech in Production & Industrial Engineering, IIT Delhi

61%, (2023)

Class XII CBSE, JNV Bundi, Rajasthan

92%, (2019)

Class X CBSE, JNV Shivpuri, MP

96%, (2017)

PROFESSIONAL SUMMARY

- **IIT Delhi** graduate with 2 years experience maintaining **JCP/JCR** at Air India as **Rave and Python** developer.
- Deep understanding of DGCA regulations and company rules with their application within crew planning (JCP/JCR)
- Specialize in JCP/JCR, drive system changes from analysis to development to deployment to align the system's capabilities with operational requirements resulting in efficient crew pairing and rostering to optimize operating cost
- Proficient in RAVE and Python development, with hands-on experience in Git and Linux for tracking and deployment

WORK EXPERIENCE

Lead engineer, Air India (Operations technology), Gurugram

(Jul 2023 – Present)

DGCA New CAR Implementation

- Developed studio and optimizer rules for maximum FDP, DP and landings in 24 hour window in RAVE for JCP/JCR.
- Developed rule to give additional rest after two consecutive ULR trips with logic to identify consecutive ULR trips.
- Aligned FT/FDP lookup table with new limits of flight time (FT) and flight duty period (FDP) for night operations.
- Developed logic to provide additional rest beyond minimum rest when transport time to/from airport exceeds a limit.

Hotel Cost Optimization

- Modeled and implemented vertical constraints for even male or even female cabin crew assignment on layover trips.
- Developed planner-facing tools like studio rules for real-time monitoring and Python reports for hotel cost analysis.
- Achieved \$550K+ monthly savings by reducing 500+ single-occupancy hotel rooms, reducing significant hotel cost.

Automation in Jeppesen System

- Developed script for automation of deadhead assignments on out-of-base assignments in JCR ensuring all the legalities.
- Developed automation script for JCP plan initialization process removing 5 manual steps including creating slices.
- Implemented standby filler script to fill empty roster lines with SBY patch ensuring legalities and lifestyle preferences.

Vistara–Air India Merger

- Enhanced JCP/JCR as per new requirements of increased fleet size and increased crew count as a result of merger.
- Developed pipelines for roster and crew data comparison for data migration from UK tracking tool to AI tracking tool.

PROJECTS

Flatmate Finder Application (Self-Driven Project)

2025

- Building a full-stack application with FastAPI, React, and PostgreSQL to connect flat seekers on a scalable platform.
- Implementing real-time messaging with WebSockets, Redis caching, and async processing for seamless user experience.

Agentic Content Generation & Publishing Pipeline (Self-Driven Project)

2025

- Built an agentic content generation pipeline leveraging multiple LLMs for automated creation of tweets and infographics.
- Designed a human-in-the-loop review system using Telegram bot, ensuring quality control before publishing content.
- Built workflow orchestration with scheduling, priority-based execution, and API integrations for end-to-end automation.

Optimization & Simulation Frameworks (Under Prof. Varun Ramamohan)

Jan – Mar 2022

- Implemented Simplex method for LP optimization and MTZ formulation for the TSP using Python and Excel Solver.
- Built Monte Carlo and Discrete Event simulations to model stochastic systems and analyze real-world variability.
- Compared performance of ML models including Gradient Boosting, Neural Networks, Logistic Regression, and SVM for predictive insights.

TECHNICAL SKILLS

Languages: Python, RAVE, SQL, Java **Frameworks & Libraries:** FastAPI, React, Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, OpenCV, Seaborn **Databases & Caching:** PostgreSQL, Redis **Developer Tools:** Git, Linux,

eclipse DWS, Docker, Visual Studio, Excel, MS Office **Specialized Skills:** Crew Planning (JCP/JCR), Optimization (LP, TSP, Monte Carlo), Workflow Automation (Python Scripting, API Integrations, WebSockets)

SCHOLASTIC ACHIEVEMENTS

- Dakshana Foundation Scholar – Top 1% selection across all JNVs in India (2017)
- Secured AIR 1431 (OB) in JEE Advanced among 0.2M students (2019)
- IIT Delhi – 1984 Batch Scholarship based on JEE Advanced performance (2020)

POSITIONS OF RESPONSIBILITY

Basketball Captain, Satpura Hostel (2022)

- Organized training camps, mentored talent, and led hostel participation in Institute tournaments.

Basketball Vice Captain, Satpura Hostel (2021)

- Conducted online events during COVID, fostered team spirit and engagement among new players.

EXTRA CURRICULAR ACTIVITIES

- Represented Satpura Hostel in Inter Hostel Championships (Athletics, Basketball).
- Managed logistics and operations of SticD Fresher's Dinner (2022).
